

WHAT CUSTOMERS SAY:

“

As a parent and teacher, I'm always looking for resources that are both fun and educational. "Five Enchanted Mermaids" checks off both boxes.

- Activities are engaging and useful

- Illustrations are clear and sized well- paper weight handles markers and gel pens beautifully

Most importantly, the Mermaids talk about social-emotional skills. Reading it with my kids sparked meaningful discussion about using those skills at home, in school and beyond. I highly recommend "Five Enchanted Mermaids" and look forward to seeing more of them!"

I bought this party pack for my niece's upcoming birthday. It arrived in a themed box with all I needed to prepare the party table. Love the box and everything in it! And, I found out that this is part of Five Enchanted Mermaids story. What a great story!! Each mermaid on the plates has her own character trait, which is also great to teach my niece!. And, each mermaid has a unique background, which is more representative of today's world. They have a coloring book that I am going to get for a party favor. Looking forward to this party and using these mermaids as teaching tools for my niece. Great product! Great concept!!

I recently purchased the Five Enchanted Mermaids for two of my granddaughters for Christmas. They both very much enjoyed learning about mermaids, their backgrounds and personal stories. Our 5 yr old kindergartener especially loved the activities, which were age appropriate and learning and spelling the mermaids names; while our first grader was fascinated by their individual qualities which prompted much discussion about her own life, talking with me about her own thoughts and worries and how they relate to each mermaid's special magical skill. It's a great bargain and I highly recommend it, it would make a great party favor gift.
